PEARSON LONGMAN DSE POWER PACK HONG KONG DIPLOMA OF SECONDARY EDUCATION EXAMINATION

## MATHEMATICS Compulsory Part PAPER 1 Question-Answer Book

Time allowed: 2¼ hours This paper must be answered in English

## INSTRUCTIONS

MOCK SET 1 MATH CP PAPER 1

- (1) This paper consists of THREE sections, A(1), A(2) and B.
- (2) Attempt ALL questions in this paper. Write your answers in the spaces provided in this Question-Answer Book. Do not write in the margins. Answers written in the margins will not be marked.
- (3) Unless otherwise specified, all working must be clearly shown.
- (4) Unless otherwise specified, numerical answers should be either exact or correct to 3 significant figures.
- (5) The diagrams in this paper are not necessarily drawn to scale.

\*For candidates who have paid our paper-marking service, please write your **Marking Number** and **E-mail Address** on the right. (The information is used for the marking service only and is not required in the HKDSE.) Please refer to the confirmation email of the marking service, or visit https://dse.pearson.com.hk for details.

5. Find the range of values of x which satisfy both (a)  $\frac{4x-7}{5} > 2(x-4)$  and  $\frac{56-3x}{7} \ge 8$ . How many non-negative integers satisfy both inequalities in (a)? (b) (4 marks) Answers written in the margins will not be marked. Answers written in the margins will not be marked. 6. The daily wage of Ada is 25% higher than that of Billy while the daily wage of Carol is 25% lower than that of Ada. Someone claims that the daily wages of Billy and Carol are the same. Do you agree? (a) Explain your answer. (b) If the sum of the daily wages of Billy and Carol is \$496, find the daily wage of Ada. (4 marks)

13. Figure 2 shows a water tank *ABCDEF*, which is in the shape of a right triangular prism. It is given that the plane *BCDF* is on the top and parallel to the horizontal and the edge *AE* touches the horizontal ground. *ABC* and *EFD* are two identical triangles while *ACDE*, *ABFE* and *BCDF* are rectangles. AE = 10 m, AB = 8 m, AC = 15 m and BC = 17 m. Initially, the tank is full of water.

Find the initial volume of the water in the tank. (a) (3 marks) (b) Water is pumped out by a pipe at a rate of 25 Litres per second constantly for 5 hours . Find the volume of water pumped out, (i) the wet area on the plate ACDE after pumping out the water. (ii) (5 marks)
